FOR LEADERS AND ADMINISTRATORS

See the provision. Find the next action.

One master workspace connects progress, risks, review pressure and EPA outcomes—with direct routes to the records behind the figures.

01

Act on the numbers

Open the matching learners, assessment queue or overdue reviews.

02

Manage delivery

Keep the priority queue, delivery week and assessor ownership in view.

03

See EPA outcomes

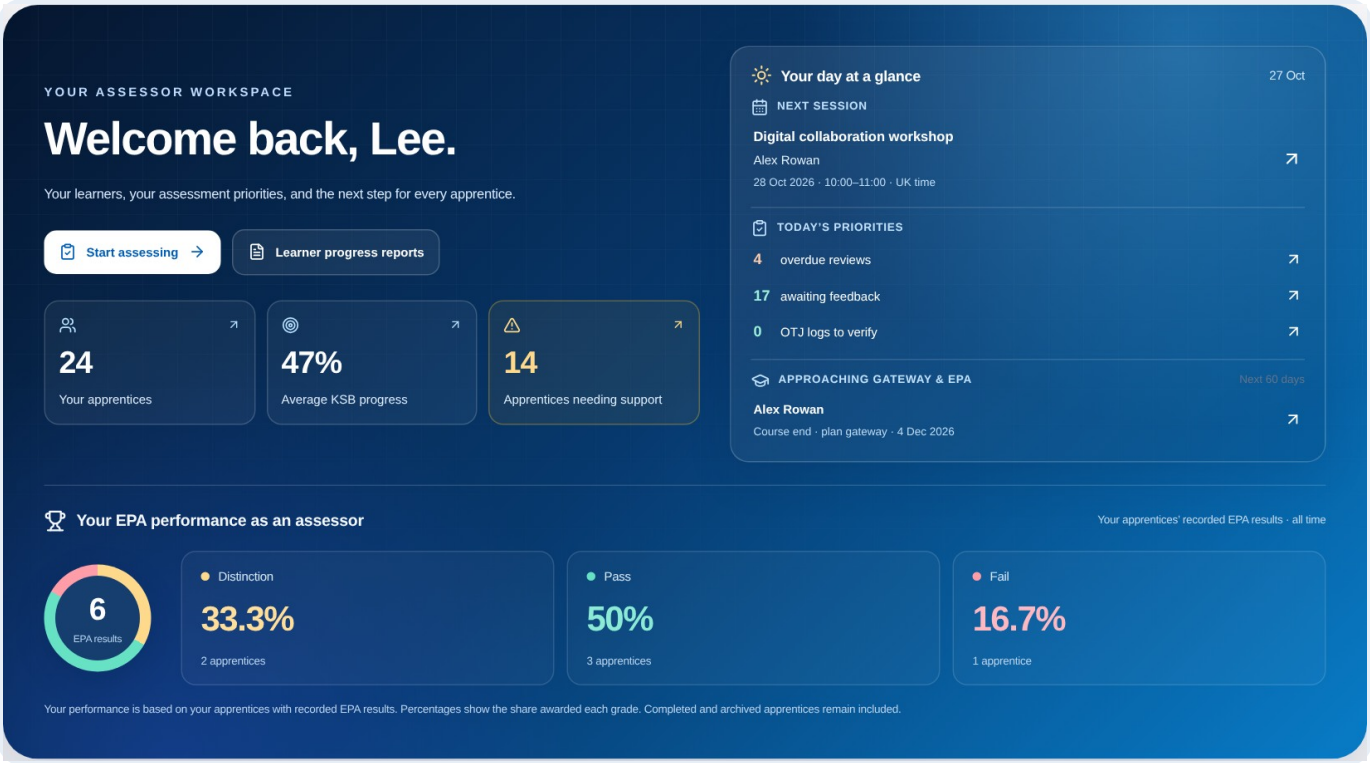

Explore Distinction, Pass and Fail results across the provision.

Platform screens use fictional learner and staff records.

FOCUSED ON THE WORK THAT MATTERS

A calmer working day.

A personal caseload, clear priorities and a direct route from the dashboard to outstanding work.

- **Your day at a glance**

  See the next session, overdue reviews, work awaiting feedback and OTJ logs to verify.

- **Work queues that match the totals**

  Open the relevant list across the active caseload, with completed records kept separately.

THOUGHTFUL TOUCHES

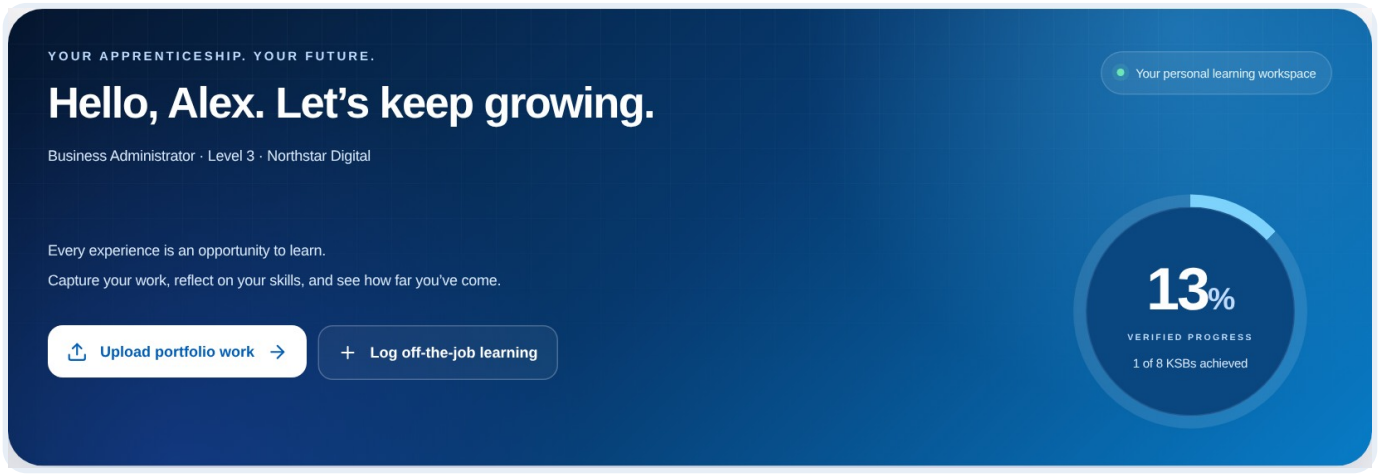

Outlook calendar subscriptions. Quick attendance. Automatic 10-week review scheduling. Individual EPA performance. Actions from reviews and assessor 1:1s.

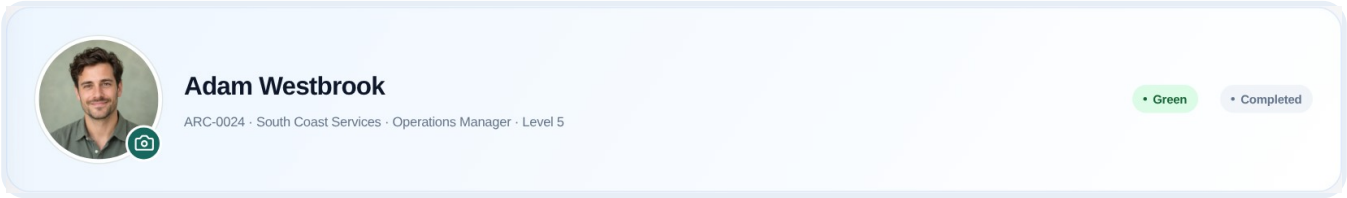

Platform screens use fictional learner and staff records.

MAKE THE NEXT STEP OBVIOUS

More ownership. Better conversations.

Help apprentices see their progress, act on feedback and bring employers into the learning conversation.

- **A portfolio that feels personal**

  Profile photos, progress, learning targets and a clear route to the next piece of work.

- **Alerts with a purpose**

  Returned work, OTJ feedback and shared updates explain the next action. Morning email reminders help teams follow up.

EMPLOYERS STAY PART OF THE JOURNEY

Organisation-scoped views, shared plans, review acknowledgements and session visibility keep workplace support connected to learning.

Platform screens use fictional learner and staff records.

TURN WORKPLACE LEARNING INTO EVIDENCE

Evidence becomes visible progress.

Keep work, criteria and assessment decisions connected throughout the programme.

01

Upload and map

Attach evidence and link it to the relevant standards and KSBs.

02

Feedback that moves learning on

Add written feedback and attachments, return work and reassess revisions.

03

Choose the EPA evidence

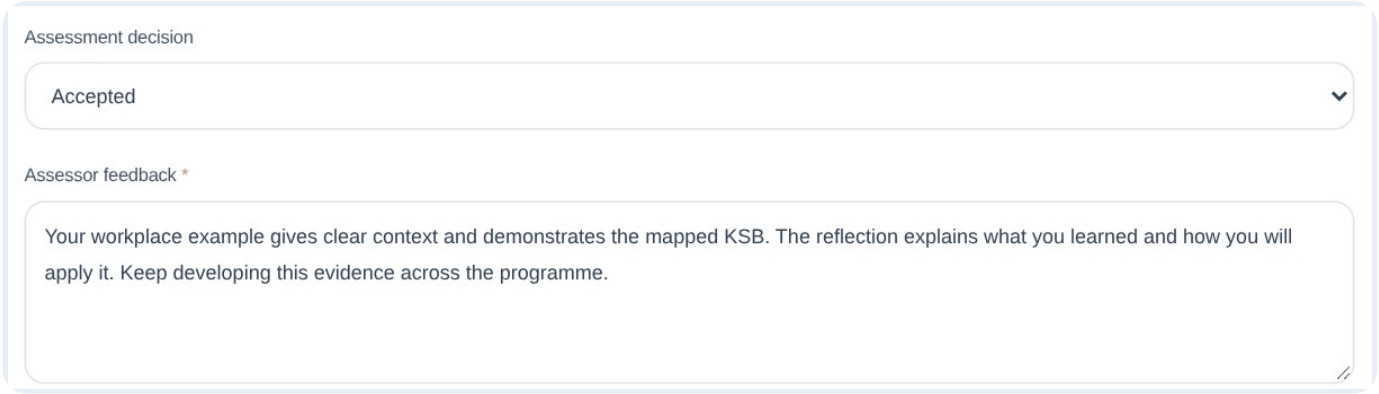

Select individual portfolio items for the EPA folder and export the evidence pack.

04

Keep the context

Assessment history, gateway checks, maths/English upskill choices and confidential learner support records.

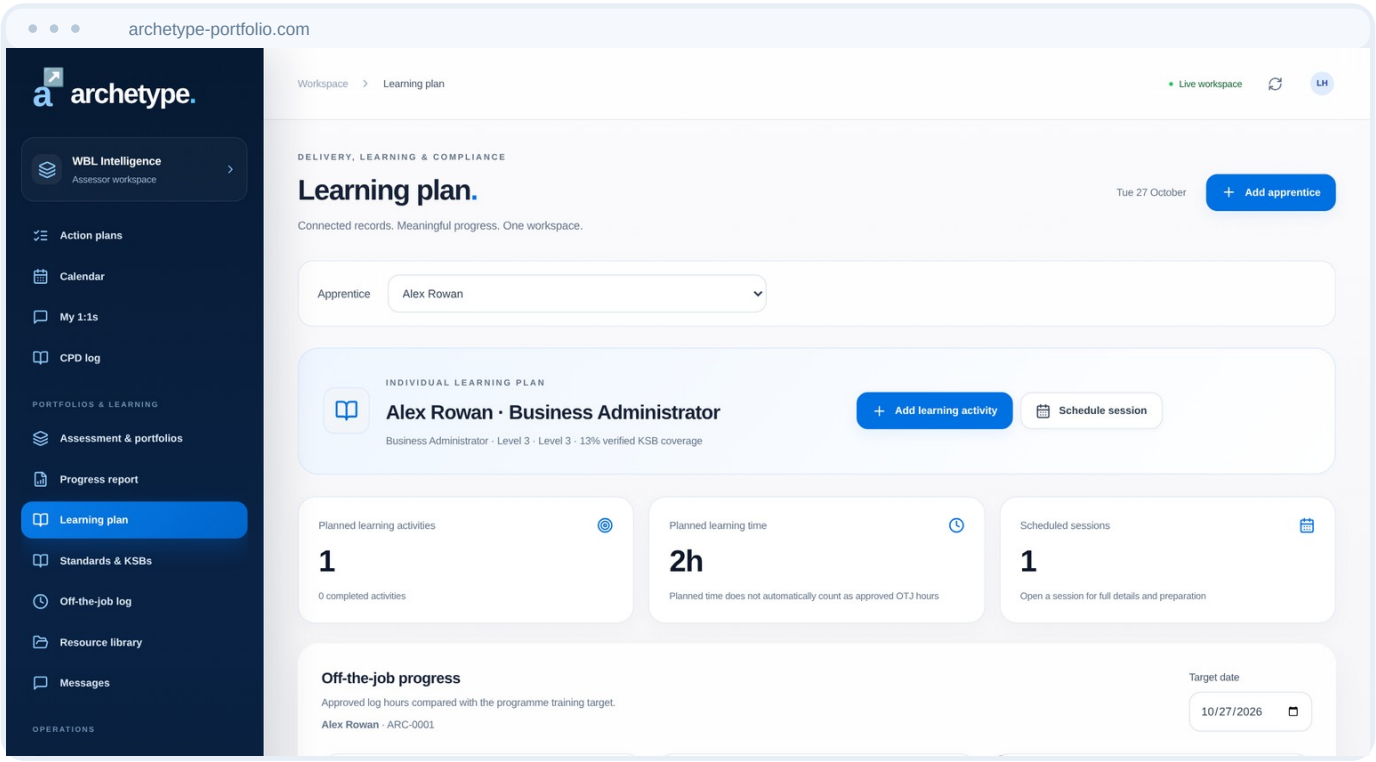

PORTFOLIO / EPA FOLDER / EXPORT PACK

Platform screens use fictional learner and staff records.

SMALL TOUCHES. LESS REPETITION.

Plan once.
Keep learning moving.

01

Reusable activities

Save learning activities and select them again for other apprentices.

02

A richer learning plan

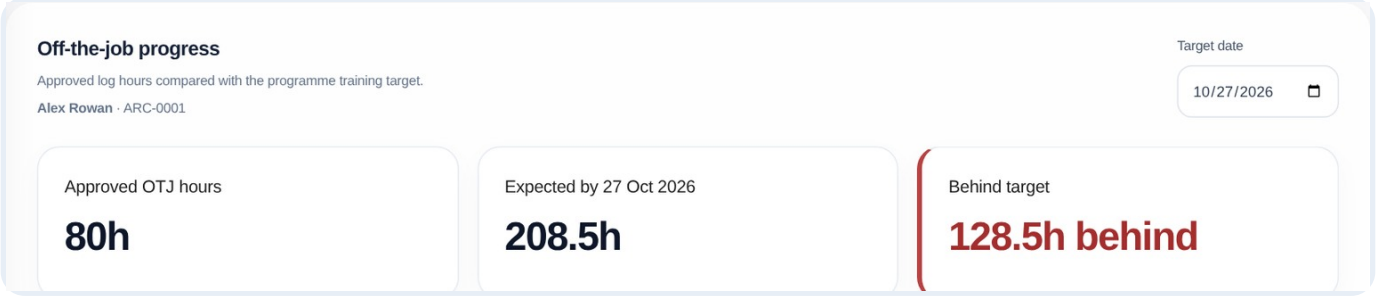

Discussions, observations, reviews, learner support and course-specific resource libraries.

03

Targets become activities

Completed review targets flow into learning plans, with session scheduling close at hand.

INDIVIDUAL OFF-THE-JOB TARGETS, MADE VISIBLE

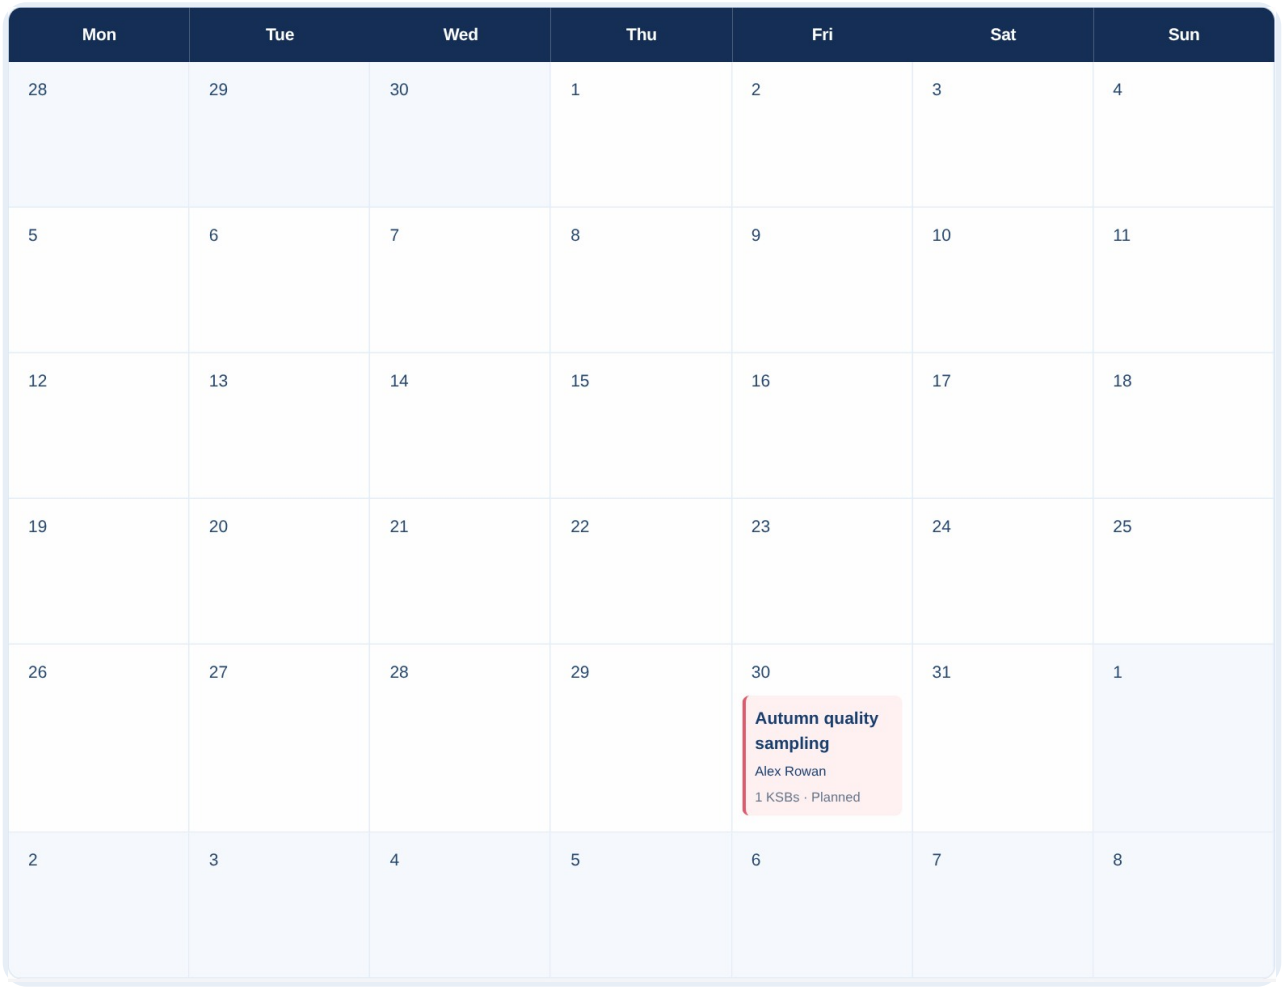

Platform screens use fictional learner and staff records.

PLAN THE SAMPLE. FOLLOW THE EVIDENCE.

Quality, with purpose.

Give IQA teams a dedicated workspace for sampling priorities, planned coverage and recorded findings.

01

Preselect the criteria

Build sampling plans around selected KSBs, evidence and risk.

02

Make the plan visible

Use a visual sampling calendar and keep the quality-assured caseload in view.

03

Record the follow-up

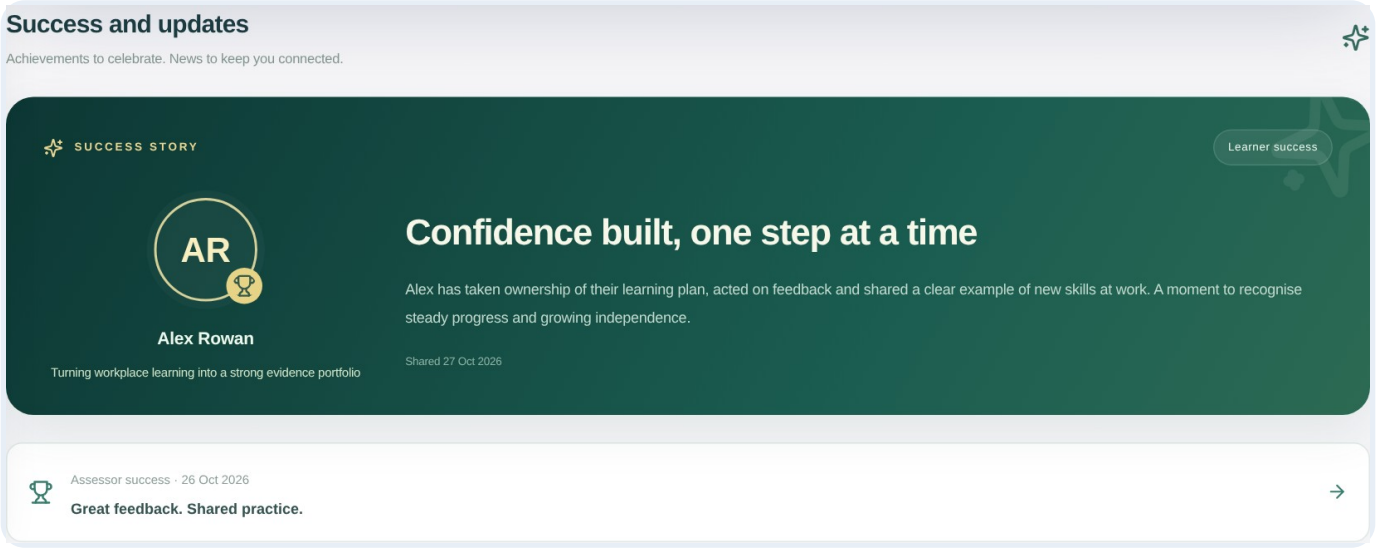

Capture sampling findings, required actions and the assessment evidence trail.

Platform screens use fictional learner and staff records.

CELEBRATE PEOPLE. GROW THE TEAM.

Recognise the progress behind the numbers.

The best learning systems make room for encouragement—not just administration.

- **Learner and team recognition**

  Publish learner achievements, assessor successes and provider updates to assessors, learners or both.

- **Control what is shared**

  Choose the audience, feature the right story and unpublish or remove posts when needed.

SUPPORT THE PEOPLE DELIVERING LEARNING

Professional development belongs in the picture too.

Assessor CPD logs. Shared 1:1 records. Owned development actions. Optional links to an apprentice—and private notes kept within the right staff roles.

Platform screens use fictional learner and staff records.

PROTECT THE INFORMATION BEHIND THE LEARNING

Encryption. Access. Accountability.

Security controls that support responsible delivery, with clear roles and a protected route to recovery.

Protected recovery copies

ENCRYPTED BACKUPS

AES-256-GCM

Authenticated encryption protects recovery copies of the database and portfolio files.

- **HTTPS in transit**

  Encrypted browser-to-service connections in the configured live HTTPS deployment.

- **Role-based access**

  Master, assessor, apprentice, IQA and employer access is scoped to the right records.

- **Private information**

  Staff-only learner support records and notes stay within their authorised roles.

- **Account safeguards**

  Salted password hashes, session revocation and time-limited password recovery.

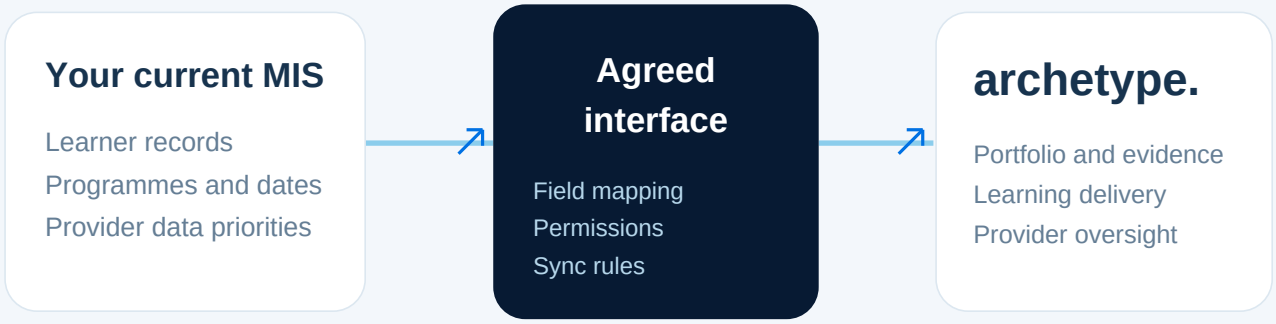

Access policies, backup retention and deployment arrangements are configured for your organisation. Encryption described here covers backups and HTTPS transport.

WORK WITH THE SYSTEMS YOU ALREADY USE

A better fit with your existing MIS.

Bespoke MIS integrations can be scoped around your current services, available APIs and agreed data requirements.

ILLUSTRATIVE INTEGRATION DESIGN

Data fields, direction and update frequency are agreed for each integration.

01

Start with your MIS

Discuss services such as ProSolution or ProMonitor and identify the interfaces available.

02

Map the right information

Agree the records, permissions and sources of truth before development.

03

Validate the connection

Test the agreed workflows and reconciliation before introducing live data.

Bespoke integrations are subject to MIS API availability, supplier access, permissions and an agreed scope. Named MIS products are examples for discussion, not prebuilt or certified connections.

A SYSTEM SHAPED AROUND YOUR TRAINING PROVIDER

Bespoke to your provider's needs.

Combine existing platform capabilities with agreed configuration and bespoke development—based on how your organisation actually delivers.

01 Your brand

Colours, identity and the experience you want learners and teams to recognise.

02 Your delivery model

Roles, caseload ownership and workflows that reflect your provision.

03 Your standards

Standards, KSB criteria and resource libraries for your programmes.

04 Your review process

Review content, learning activities, targets and follow-up priorities.

05 Your reporting needs

Dashboards and outputs focused on the decisions your team needs to make.

06 Your connections

A scoped approach to existing MIS, calendar and other agreed service integrations.

FROM REQUIREMENTS TO A WORKING PROVIDER SYSTEM

Discover — Shape — Build — Validate — Evolve

Configuration and bespoke development are agreed through a provider specification.

SUPPORT BEYOND LAUNCH

Built for today.
Ready for what’s next.

Help future-proof your provision with ongoing support, planned improvements and a roadmap shaped around your priorities.

01

Get started with confidence

Agree onboarding, setup and user familiarisation around your people and delivery processes.

02

Support while you deliver

A support service can cover practical queries, configuration help and agreed workflow refinements.

03

Keep the system moving forward

Review changing requirements and prioritise enhancements as standards, technology and delivery needs evolve.

Future-ready is an ongoing partnership.

Support scope, response arrangements and enhancement priorities are agreed with each provider.

ARCHETYPE COACHING GROUP

Let’s shape your platform.

A provider-specific platform. A connected learning journey. Support beyond launch.

WHAT WOULD YOU LIKE TO SEE?

Tell us what you deliver, which systems you use and where you need a better fit. We can shape the platform, support and integration scope together.
